This report supersedes any previous revision with this reference. This document must not be reproduced, except in full. If samples were provided by the customer, results apply only to the samples 'as received' and responsibility for representative sampling rests with the customer. Sample preparation was conducted in accordance with Agricultural and Veterinary Chemicals Code (MRL Standard) Instrument 2019, Table 2, unless otherwise indicated in the 'Report Comments' section. Measurement Uncertainty is available upon request. If the laboratory was authorised to conduct testing on samples received outside of the specified conditions, all test results may be impacted. Details of samples received outside of the specified conditions are mentioned in the sample description section of this test report.

### Definitions

| <: Less Than | >: Greater Than | ---: Not Received/Not Requested | NA: Not Applicable | ND: Not Detected | [NT]: Not Tested | CL: Confidence Level | NL: No MRL Listed | MF: Mixed Food | LOR: Limit of Reporting | TBA: To Be Advised |  
| ^ Subcontracted Analysis | \* Test not covered by NATA scope of accreditation | # The result is derived from a calculation incorporating the residue definition of chemicals defined in the Agricultural and Veterinary Chemicals Code (MRL Standard) Instrument 2019. Results equal to or exceeding the LOR are included in the calculation. | IH: Inconsistent results possibly caused by sample homogeneity |

### Authorised By

Name	Position	Accreditation Category
Yeelen Chui	Residue Laboratory Manager, Brisbane	Environmental and Food Chemistry

### General Comments

A result of "<LOR" indicates no chemical on the 'Method Analyte List' was detected at a concentration equal to or exceeding the stated LOR.  
If a chemical is detected at a concentration equal to or exceeding the stated LOR, it will be detailed in the 'Analytical Result Summary.' All other chemicals included in the 'Method Analyte List' were not detected at or exceeding the listed LOR.  
MRL information is only provided in the event of a chemical detection exceeding the LOR on a single commodity.  
MRL information is not provided for mixed foods. Further information regarding mixed food MRL's can be obtained from Food Standards Code, part 1.4.2 – AgVet Chemical.  
In accordance with the Queensland Chemical Usage (Agricultural and Veterinary) Control Act 1988, the laboratory must discharge its lawful obligations in accordance with Division 4, Section 15 & 15A and notify the standards officer of any potential MRL exceedances.  
Disclaimer: All reasonable measures have been taken to ensure the MRL information provided is accurate and current. No liability is accepted by Symbio Laboratories for any occurrence arising from the adoption of any of the information.

### Analysis Location

All in-house analysis was completed by Symbio Laboratories - Brisbane.

### Report Comments

MRL : Maximum Residue Limit as defined by Food Standards Code, Schedules 19, 20 and 21.
